

Deliverable D9.3

Data management plan (2nd release)

WP9

Grant Agreement number	792355
Project acronym	GEO4CIVHIC
Project full title	Most Easy, Efficient and Low Cost Geothermal Systems for Retrofitting Civil and Historical Buildings
Due date of deliverable	30/09/2018 (M6)
Lead beneficiary	1 - CNR
Other authors	2-UNIPD, 3-UPV, 4-RED, 5-GEOSERV, 6-GALLETTI, 7-TECNALIA, 8-TKI, 9-UNESCO, 10-FAU, 11-RGS SRG, 12-CRES, 13-HYDRA, 14-UBEG, 15-GEOGREEN, 16-PIETRE, 17-SOLINTEL, 18-DLH, 19-SUPSI

Dissemination Level

PU	Public	
CO	Confidential, only for members of the consortium (including the Commission Services)	X
CI	Classified, as referred to in Commission Decision 2001/844/EC	

Publishable summary

The D9.3 “Data management plan” is a confidential document delivered in the context of WP9, Task 9.2: Overall coordination and Consortium management with regard to data management, collection, generation, storage and preservation.

This document describes the Data Management Plan (DMP) for Most Easy, Efficient and Low Cost Geothermal Systems for Retrofitting Civil and Historical Buildings (GEO4CIVHIC) Project.

The GEO4CIVHIC project participates in the Pilot on Open Research Data launched by the European Commission along with the H2020 programme. The use of a Data Management Plan is required for all participating projects.

This document defines the policy adopted for the management of data produced or collected during the project activity, including their storage in a suitable online repository to assure optimal preservation, security and sharing performances.

This DMP also describes the data management life cycle for the collected, processed and/or generated data during the GEO4CIVHIC project. At this regard, it will include information on: the handling of research data during and after the end of the project, what data will be collected, processed and/or generated, which methodology & standards will be applied, whether data will be shared/made open access and, how data will be curated & preserved (including after the end of the project).

This deliverable represents the DMP at the present stage of the project: during the project life cycle, new information will update the DMP as described in following sections. Indeed, the datasets are not fixed; quite the opposite, they will evolve during the lifespan of the project, particularly whenever significant changes arise such as changes in Consortium policies. Future modifications will be tracked during each periodic report.
